1. What are your main take-aways from the video?

mistake → brain grows
synapse fired if didn't make mistake

2. How can you apply what you learned about mistakes to your school work?

Write the equation of the function below

$$f(x) = -|x-1| + 3$$

$$\text{Domain: } (-\infty, \infty)$$

$$\text{Range: } (-\infty, 3]$$

$$y \leq 3$$

Write the equation of the function described

An absolute value function shifted right 2,
down 7 and compressed by a factor of $\frac{3}{4}$

$$y = \frac{3}{4}|x-2| - 7$$

Task 1.2 Intro to Piecewise Functions Activity Name _____ Hr _____

1-6. Graph the following inequalities on the number line.

1. $x > 2$

2. $p \leq 0$

3. $r \geq -4$

4. $-1 < x < 6$

5. $3 \leq p < 6$

6. $-5 \leq r \leq 0$

7-10. Graph the following functions

7. $f(x) = \frac{1}{2}x - 2$

8. $f(x) = -2x + 5$

9. $f(x) = |x| + 1$

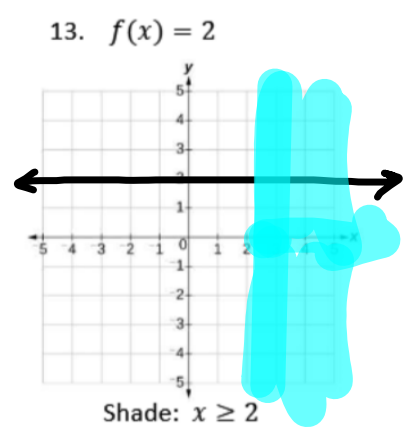

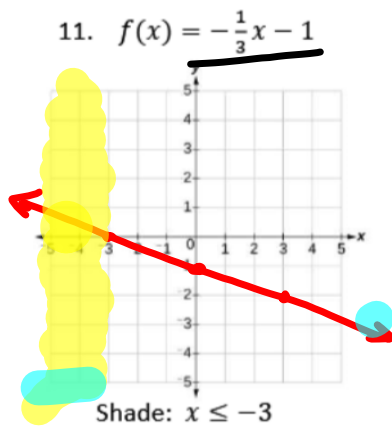

10. $f(x) = 3$

$y = mx + b$
 ↓ slope ↓ y-int

$y = 0x + 3$
 $y = -2$

11-13: Graph the functions. Then, lightly shade the part of each graph that fits in the given inequality boundary. Finally, Fold paper so only colored parts of each graph are showing to create one big graph.

14. Draw the final image that's created when the lines are folded. (All the colored parts). Be sure to include open and closed dots where appropriate.

Piecewise function:

$$f(x) = \begin{cases} -\frac{1}{3}x - 1, & x \leq -3 \\ |x| - 1, & -3 < x < 2 \\ 2, & x \geq 2 \end{cases}$$
